

1. Brief explanation of the CCSASM Program.

The Certified Cyber Security ArchitectSM (CCSASM) is a unique program of its type in the compliance and security industry - indeed, *the first of its type in the world*. This program validates knowledge and skill sets to examine, build a practical and applicable cybersecurity program for an organization.

2. What are the major areas CCSASM Program covers?

- ✓ Examine how to establish a cybersecurity program based on the NIST Cybersecurity Framework.
- ✓ Step through key areas that must be addressed in a credible incident response plan.
- ✓ Walk through core components, organization, and CMMC Maturity Levels. Examine CMMC domains and CMMC capabilities required for organizations.

3. What are the credentials of the CCSASM Program?

The CCSASM credential is a job-role-based designation. This program is designed to enable professionals to understand, prioritize, and ultimately assist organizations in achieving compliance with information security-based regulations.

4. What is the prerequisite for the CCSASM course?

It is strongly recommended that the candidate pass a major security certification exam such as CISSP, CISA or CISM, CSCSTM, or have equivalent knowledge and experience.

5. Who is the target audience for the CCSASM certification?

The complete one-day CCSASM program is of value to compliance professionals and managers, information security officers, security practitioners, privacy officers, and senior IT professionals.
